

HSE Policy

Environment, Health and Safety Policy

Health, Safety and Environment Policy

To protect the environment and prevent damage or poor health by introducing healthy manufacturing practices, minimizing pollutants, and eliminating hazards to health and safety at work.

To inculcate the principles of safety, health and environmental care in its people and processes on an ongoing basis to strengthen the EHS culture.

To continuously improve environmental, health and safety performance by setting and meeting EHS objectives

To continuously work on cost-effective technological interventions to minimize the risk to people, property and reduce negative environmental impact through the adoption of elimination, substitution, reduction, recycling, reuse and recovery at source

Engage people in all workplaces through EHS issues effective participation and consultation.

To ensure a safe and healthy working environment in the workplace by following exemplary cleaning and safe work practices.

To comply with all legal and other compliance obligations regarding the environment, health and safety.
